

Air Conditioning Coils

SERCK Coils

Serck is a premier coil design & manufacturing company that makes replacement coils for the Air-Conditioning, Refrigeration and Heating industry. We pride ourselves with a reputation for high Coils are produced in 3/8", 1/2" and 5/8" diameter tubes with fin densities between 6 to 20 fins per inch with lengths of up to 500". Coils are offered in both aluminum and copper fins.

Technical Drawings and Coatings

Serck has a library of over a 1300 drawings for various models from leading brands like Carrier, York, Trane, Hitachi, McQuay etc.. Heresite protective coating is used for clients who need a 5 year warranty for coils that are situated in highly corrosive environments. We offer two types of coatings on coils:

- Epoxy Ester Coupon Blue; and
- Heresite Phenolic coating

Markets and Manufacturing

Besides the local market in UAE, Serck markets coils to over 20 countries throughout the world. Along with competitive prices, efficient delivery and total quality products and services, Serck offer a one year warranty against leaks arising due to manufacturing defects. At Serck manufacturing all raw materials are sourced from all over the world ensuring all products are of the highest standard.

Serck Services through its ability to meet market demands has obtained the industry's leadership position and continues to strive to maintain this position. The broad spectrum of applications covered by Serck Air Conditioning Coil Division has created a strong demand in a variety of markets including Health and Educational Facilities, Recreation Industry, Industrial Process and Food Processing Industries, just to name a few.
