

Shell & Tube Heat

Re-Manufacture

Serck Services design and manufacture complete range of shell & tube heat exchangers for Marine, Oil & Gas and Petrochemical industries. We stock wide range ferrous non ferrous tubes from ¼” to 1” and can manufacture a 6Mtr long exchanger in 8 days time. If the clients need to manufacture heat exchanger as per sample, we send our engineering team on board or on site to take manufacturing drawing and manufacture as per sample within a short period of time

Serck are specialized in manufacturing Marine Keel Coolers (Box Coolers) for marine industry. We are working very closely with most of the dredging companies and manufacture keel coolers for dredgers in and around the region.

Re-tubing/Repair

We have specialized teams with re-tubing/repair expertise who go on board or site on a short notice and do re-tube or permanent /temporary repair. We take required dimensions to manufacture new exchanger as per sample if it is a temporary repair and upon approval from client manufacture and supply new within a short period of time.

Servicing

We service shell and tube exchangers on urgent basis working round the clock and complete within 24 hours. Our workshop is open round the clock providing service to our customers. Keel coolers are serviced and protected with coatings to suit for sea water and to protect from binnacles.
